

REDEEM OUR CITY PROJECT – INFORMATION SESSIONS (MP4)

ROC BACKGROUND:

In 2014 the Pretoria Prayer Force strongly felt that though they were praying faithfully and continually for Pretoria / Tshwane, they needed a more thorough and systematic plan to pray for their city.

Right through 2015 a faithful team came together for the purpose of studying Scripture and seeking Biblical understanding about cities, hoping to develop some understanding that would help them pray for the city more effectively.

The PPF team developed a model from the insights gained from these studies. The ROC process is fully Bible-based, yet also fully experimental in nature. The series of prayer projects implemented since 2016 focused on different components of the urban environment as revealed in Scripture.

The ROC projects have been innovative and revelatory. The process uses the Heavenly Jerusalem city model to identify spiritually significant elements that need prayer in the city context.

Every ROC project was launched with an information session where the content of the upcoming prayer initiative was discussed and presented to participants. Here below you can find the Mp4 recordings with their PowerPoints to explain each of the ROC projects.
